Unauthorised copying, selling; distribution for gain or any other such process that will result in personal gain for the individual is strictly prohibited without prior consent from the author.

Taekwondo Rank Requirements

Advancement above 4th Dan is achieved through a number of criteria as follows, (see note 1 below)

- Time since attaining last grade
- Theoretical knowledge
- Practical ability
- Attendance
- Teaching ability
- Student grading passes
- Theory examination

Note 1: Grading examinations can be conducted by instructors up to two grades below their present grade, i.e. 2nd Dan instructors can grade students up to 1st Kup.

Master level instructors (5th Dan and above) can grade students up to one grade below their present grade, i.e. 5th Dan can grade students to 4th Dan.

Note 2: Practical examinations are not usually required above 4th Dan.

Note 3: When grading, students will be required to perform techniques in combinations on mitts and pads, sparring is also an integral part of the grading process. It is the student's responsibility to ensure they have the appropriate protective equipment.

Note 4: All gradings require that the student perform ALL techniques learnt from beginning training in Taekwondo.

Note 5: Minimum age requirement for first Dan is 18. We will promote students below 18 to junior black belt status. Time required is the same as for adult black belts. Once a junior black belt student reaches 18, they will automatically be promoted to first Dan (adult level). A junior cannot be promoted above first Dan until they reach adult level. Once at adult level, they may test for second Dan if they have the required time in grade (2 years).

The Meaning of the Belt Colours

White signifies a birth, or beginning, of a seed. A white belt student is a beginner searching for knowledge of the art.

Yellow signifies the first beam of sunlight which shines upon the seed giving it new strength with the beginning of new life. A yellow belt student is given their first ray of knowledge, opening their mind, from an instructor.

Green signifies the growth of the seed as it sprouts from the earth reaching toward the sun and begins to grow into a plant. A green belt student learns to further develop and refine their techniques.

Blue signifies the blue sky as the plant continues to grow toward it. A blue belt student moves up higher in rank just as the plant grows taller. The light feeds the plant so it can continue to grow. The student is fed additional knowledge of the art to enable their body and mind to continue to grow and develop.

Red signifies the red hot heat of the sun as the plant continues growing toward it. A red belt student is higher in rank, they acquire more detailed knowledge and, just as the plant grows slowly toward the sun, so the red belt student learns to be more cautious as their knowledge and physical abilities increase.

Black signifies the darkness beyond the sun. A black belt seeks new knowledge of the art. As they begin to teach others, they begin planting new seeds, their students, many of which will take root deep into the art, blossom and grow through the ranks in a never ending process of self growth, knowledge, and enlightenment.

10th Kup White Belt to 9th Kup White Belt – Yellow Stripe

TIME in TRAINING	2 Months
PATTERN	KI-CHO 1 & 2 (WTF) Or 4-DIRECTION PUNCH (ITF) 4-DIRECTION LOW BLOCK (ITF)
